The new Lutron HomeWorks QS lighting system review

For the past 10 years, the majority of Lutron lighting control systems in both Residential and Commercial spaces has been under the HomeWorks Illuminations line. Recently, Lutron has released a updated control system called HomeWorks QS. The new QS system boast impressive updates to the lighting control system including the following:

- Updated iPad/iPhone user app allowing more user controls of system
- Visual keypads that display a graphical user interface similar to a small touch screen
- Integration with HVAC controls built into system
- Enhanced wireless motion sensors for Occupancy/Vacancy control
- Complete wireless solutions for retrofit projects
- Smaller more compact devices requiring less space

The QS system will become the new standard for lighting control projects of all sizes adding energy savings and convince.

Project In Progress

This Sonoma County Estate set amongst the foothill vineyards totals just over 16,000 square feet. Working with the electrical contractor, electrical engineer, and general contractor, LAViD Designs has completed the design for a full home lighting control system which also includes the landscape and exterior. This estate will also include motorized shading solutions, motorized moveable window walls, patio heaters, and motorized stairs. All of these items are controlled via the lighting control system with a touch of a button or from the homeowners iPad. The expected completion date of the project is early Fall 2011. Look for additional pictures in coming newsletters.

About LAViD Designs

LAViD Designs specializes in Lighting Design, Lighting Control Systems Design, and Audio/Video Systems Design in Commercial and Residential projects. Our goal is to find the best possible solution while keeping in mind important factors such as esthetics, ease of use, and energy savings. We are able to design systems that best fits the clients needs and budget.
